EXPERIENCE

1 **Granicus Inc.** Sep 2022 – Present
Senior Frontend Engineer
Bangalore

- Own and evolve the Granicus Design System: tokens, foundations, React components, patterns, and contribution guidelines.
- Use AI in the practice: MCP, shared skills, and the model that fits the job, then check the result against the system.
- Align design and engineering through Figma libraries and Storybook so libraries and code stay in sync.
- Raise the bar on accessibility, consistency, and predictable interaction across multi-product adoption.
- Document patterns as recipes for common flows - forms, filters, progressive disclosure, notifications.

2 **Accenture AI** Dec 2018 – Sep 2022
Front-end Engineer
Bangalore · via Kogentix acquisition

- Shipped analytics and insights product UI for enterprise clients with Next.js, React, and Vue.
- Led frontend on Delivery Inaccuracy (Next.js reporting) and MCInsights (Vue insights shell).
- Built React expense UI (Zero Quartile) with Redux and D3 visualizations for spend profiling.
- Worked daily with design, engineering, and stakeholders across multi-disciplinary teams.

3 **Kogentix Inc.** Jun 2017 – Nov 2018
UI Engineer
Bangalore

- Built Angular + TypeScript interfaces for Asset Insights (IoT) and AMP (Automated ML Platform).
- Owned Rule Engine module work with design and engineering partners.

4 **Flutura Decision Sciences & Analytics** Aug 2015 – May 2017
Programmer / Frontend Developer
Bangalore

- Developed IoT and analytics UIs for supply-chain and solar operations on Django/jQuery stacks.
- Joined weekly client product and implementation discussions.
